

6.3 Sample Code

Servlet code for LoginValidate

```
response.setContentType( "text/html" );
PrintWriter out = response.getWriter();
String UserName=request.getString(UserId);
String Password=request.getString(Password);
String query;
try {
    query="Select * from authen where USERID=" +UserId " AND PASSWORD="
        +Password;
    ResultSet rs=statement.executeQuery(query);
    if (rs.next())
    {
        out.println("<head>");
        out.println("<title>");
        out.println("FSFSONLINE- LIFE INSURANCE");
        out.println("</title>");
        out.println("</head>");
        out.println("<body>");
        out.println("<h1>Hello"+UserId + ",<br>");
        out.println("Welcome to FSFOnline</h1>");
        out.println("<p>&nbsp;</p>");
        out.println("&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;<a href=\"\\application.jsp\\\"> Create
            Policy");
        out.println("</a> <br> <br> <br>");
        out.println("&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;<a href=\"\\transform.jsp\\\"> Pay
            Premium </a>");
        out.println("<p>&nbsp;</p>");
        out.println("<input type=\"submit\" value=\"Logout\">");
        out.println("</body></html>");
    }
    else
    {
        response.sendRedirect("loginFail.jsp");
    }
    rs.close();
} catch(Exception e)
{
    response.sendRedirect("loginFail.jsp");
}
```
